aneemo

Brain Injury training combining cutting edge technology with clinical expertise

50% of people experiencing homelessness have a traumatic Brain Injury.

60% of people in the criminal justice system have a brain injury history.

5 x more prevalent in clients that are rough sleeping compared to the general population.

WHO NEEDS THIS TRAINING?

- Homelessness
- Housing Health & Mental health
- Drug & alcohol
- Probation
- Local authorities
- Community outreach and Charities

- **Presentations** are misunderstood. Services **fail** to provide the most **effective support** and needs remain **unmet.**

- 1 **enabler** for providing effective support to Brain Injury sufferers is '**experienced staff with practical skills'**
  BMC Health Services Research, 2023

- Gaps in knowledge are a **key barrier** to service provision and, if **unaddressed**, 'this knowledge gap can perpetuate Brain Injury related challenges and **contribute to a repetitive cycle of Brain Injury and homelessness** (Chan et al, 2022).'

- In a 2022 report Headway UK, the brain Injury association, calls for **more specialised training** for prision staff in order to **improve engagement** and communication with BI suffers, and better their chances for **more effective rehabilitation.**

THE SOLUTION

aneemo’s new course - 'Working with Brain Injury in populations experiencing Multiple Disadvantage', equips frontline staff with the knowledge, skills and confidence to identify and support people with an Acquired Brain injury.
